

## Curriculum Vitae

*Dr. Ramakrishna Rao Muthyala*

*MA.MA, Ph.D. D.Sc. UWA, FBU, FBQS, FSASS, FRGS*

- Education is not about age; It is to cultivate knowledge.*
- We can face untruth and iniquity with the knowledge of truth and righteousness.*
- The truth and virtue of the scripture we have written may take a few years to come true, so be patient*
- Some pages are enough for today's scientific research; some time is needed but many pages are long enough for spirituality research.*
- We must have faith in the research we do.*
- Research develop knowledge based on what they read. The scriptures written by them are not eternal. The great sages practice penance and attain enlightenment. The texts they wrote are eternal.*

## Biodata

**Full Name:** *Dr. Ramakrishna Rao Muthyala*

**Father Name:** *M. Kondal Rao*

**Mother Name:** *M. Saraswathi Bai*

**Place of Birth:** *Hyderabad*

**Date of Birth:** *31<sup>st</sup> July 1956*

**Service:** *Health Section Greater Municipal Corporation of Hyderabad*

**Education:** *D. Sc.in Geography*

**Period of Service:** *1981 to 2011 (Voluntary retirement)*

**Present Position:** *Author Researcher*

**Permanent Address:** *Green Blossoms apartment, Flat No:421*

**Opposite:** *Raja Pushpa Atria, Kokapet*

**City:** *Hyderabad*

**Pin Code:** *500075*

**State:** *Telangana*

**Country:** *India*

**Email:** *graceofsreerama@gmail.com*

**Cell no:** *91+9866420245*

*-Education is the guiding index of man*

*Money, grain, wealth is impermanent, education is eternal*

*All we have got is to give up on this earth*

*We come alone, we go alone, everything we see in the middle remains a dream art.*

*All will not be robbed, no one will be robbed of education, it will be with us, and will eventually retain our name forever.*

*The more education is donated the more it is left over, the more money is donated it melts away, we cannot see the knowledge within us, but we can see our beauty.*

*Details of memberships in various Societies and Associations*

Book Name	Section Name	Section images
<b>Geography of Ramayana</b>	<b>1.Geological condition:</b> Man, enters the lap of the earth the moment he gets out form his mother's womb. The earth remains his shelter as long as he lives. God has arranged for his sustenance even before he is born. So, the geographical condition is considered the first stage in man's odyssey.	

## 2. Biological condition:

The earth is the base for man to make steady growth. There are 84 million species of animals on the earth as per Vedas as well as science. Some animals have become extinct both on account of the vagaries of nature, and changes in the geological conditions. Certain animals are seen through the microscope and some not visible even through the microscope. A man takes birth and receives fruits of the deeds of his previous births. This is known as “The Law of Karma “. Also, the creation of the universe by Brahma is sufficiently dealt with. The biological condition regarded the second state as man's stay changes from his mother's womb to the earth.

### 3. Chronological

**condition:** It is related to both the above conditions. Time is a measuring rod to record the changes on the earth and the development of man. The wheel of time rotates eternally, all the incarnations, the time of Brahma (The Creation) and the age of mankind spreading across the enormous gamut of time. Time is a base for geological as well as biological transformation. So, it is termed the third condition.

It is related to time. The position of the planets, stars and their movements with the passage of times brings about changes in human beings, as well as on the earth. So, changes in time can be known on the basis of the movement of the stars and the planets. Therefore, the astrological condition is dealt with in the fourth chapter after that dealing with time.

The distance between the earth and heavenly bodies (Planets and stars) and distance of them from the earth on account of their movement was measured in times of "Yojanas" in the ancient times. Accordingly, in the Ramayana also distance was measured by Yojanas. Later the conversion of yojanas into miles came to be made.

**6. The journey of Rama:**

This is linked to all the preceding five aspects. Having been born on the earth, Sri Rama walked on foot across the length and breadth of the country (India) and the distance covered by Him has been measured by Yojanas. So, this chapter becomes the eighth one in the book. Figure-1 Journey of Lord Sri Rama walking from Ayodhya to Indian southern tip, Southern tip (Kanyakumari) is the point constriction of Sethu (the bridge) to take place.

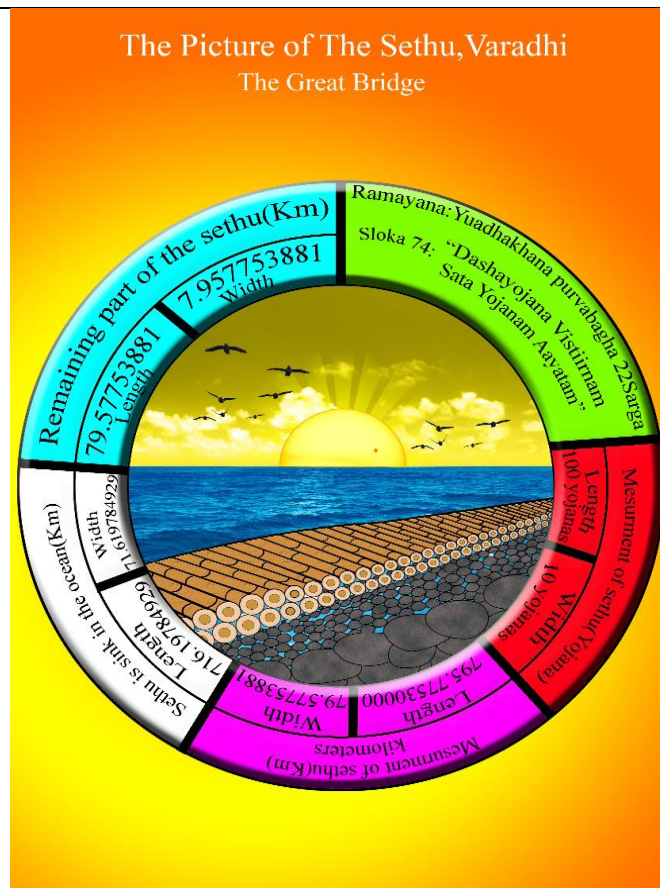

**7. The lineage of Rulers:**

The chapter gives an account of the names of the kings of the Surya and Chandra dynasties and their respective tenures. Fittingly it is included in the seventh section.

**8. The Picture of the Sethu (The great bridge);** This part gives an insight into the way Rama undertook a hectic journey on foot to the Southern tip of the country and the way he got the endless bridge (The great Sethu or Varadhi) constructed across the Southern Ocean to reach the city of Lanka. The great Sethu was constructed with trees and rocks. This consists of nature's bounty. The length and width of the bridge were calculated in yojana units in the Ramayana. So, the chapter becomes eighth in the order.

**9. A view of the city of Lanka:** This chapter is a sequel to the preceding three chapters. In this book "Geography of Ramayana" (Sri Ramabdh Shuktimani) the 8th, 9th chapters assume a lot of importance. The city of Lanka underwent a transformation from its geological condition on account of the movement of earth. The way it lost its original state and assumed a new state is explained from the angle of modern Science.

**10. Research aspect:** All the things discussed including different conditions and their changes are explained from the point of view of the legend as well as modern Science in this section. The situation regarding the great Sethu, the city of Lanka and the Simhala Island along with changes in nature are elaborated in the section which logically occupies the tenth place in the order.

**11. Indian cultural Scenario:** The part explains how our people even today are following such ancient Indian culture as seen in our mythologies and legends. Even the historians of other countries have written books glorifying our culture. So, it is included in the eleventh section.

	<p><b>12. Bibliographical details:</b> The section provides information regarding the books in English and Telugu from which data has been collected for writing the book. So, it occupies the 12th place in the sequence.</p>	
	<p><b>13. Lineage of the author:</b> This chapter gives an account of the heredity of the author who has undertaken the uphill task of writing a research-oriented book based on Ramayana with an aim of showing the authentic picture of the great Sethu or Varadhi (the great bridge), Lanka Nagara, Simhala, island, etc. by patiently and perseveringly gathering information from various sources, mythological legendary and Scientific. So naturally, it has become the penultimate section.</p>	

	<p><b>14. Graphic representation:</b> This section gives a pictorial description of certain important things mentioned in chapters 1 to 11. The last section, therefore, appears to be the fitting conclusion of the treatise.</p>	
--	--	--

***“It is human nature to protect our virtue and culture”***

#### **Teaching Experience:**

Subject knowledge of Geography, Regional Geography, Drifting knowledge, Ancient Geography etc.

#### **Author Esperance: 1996 to 2019**

**1.Sri Rama Ramayana:** Telugu version 4 volumes, total pages 2702, Copyrights Indian Government copyrights.

#### **Research Esperance: 2004 to 2019**

**2.Geography of Ramayana:** (Indian Mythological and modern Scientific methods are interconnected) English Version 3 Volumes, total pages 1725, Copyrights Indian Government copyrights, and United States of America Government Copyrights.

*“When we read a scripture that whole scripture touches our heart and a single word cause thought in us. The idea of finding the links to the word that gave rise to the research will lead you to research. As long as your research is relevant to the bibliography and to the scientific aspects, the effort you put into that book will last forever when it is useful to everyone. The scientific connection to mythological is the most difficult. It is very difficult to steer these two opposites in the same direction. The Geography of Ramayana that I have written belongs to the same category”.*

#### **Australia Address:**

13 Chameleon TCE, Point Cook VIC 3030, Australia
